International Tourism Performance in Free State up to 2015

Compared to 2014 figures, there has been a decrease in the number of international tourists visiting the Free State. There were 960 147 international tourist arrivals who visited the Free State however in 2015 there was a decline of 12 286 which resulted in 947 861 international tourist arrivals that visited the Free State. However when comparing the distribution of international tourist arrivals with the other eight provinces, the share of arrivals for Free State has increased in 2015 to 10.6% from 10.1% in 2014

Distribution of International Tourist Arrivals by Province (2014-2015)

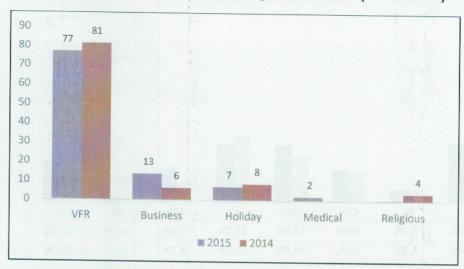

Data for 2014 and 2015 shows that the spend in Free State from international tourist arrivals has increased by 9.5% (R 114 million) in 2015 to R 1 320 million from R 1 206 million in 2014. The average length of stay for international tourists visiting Free State increased slightly from 9.6 days in 2014 to 9.7 days in 2015 (South African Tourism 2015). In 2014, paid bed nights in the Free State was 409 863 which increased by 30.5% in 2015 to 534 748.

All categories of purpose of visit has also increased from 2014 to 2015 with an exception of visiting friends and relatives (VFR) which decreased from 87.9% in 2014 to 66.6% in 2015. Seasonality in the Free State increased with the index moving from 4.38% in 2014 to 6.96% in 2015. (SAT Dataset 2015).

Domestic Tourism Performance in Free State (2015)

Overall domestic tourism results for 2015 show that the number of domestic tourism trips decreased by 12.5% from 28.0 million in 2014 to 24, 5 million in 2015. However trips from domestic tourists to Free State has increased from 4% in 2014 to 5% in 2015. As seen in figure 2, most of the domestic trips taken were for the purpose of visiting friends and relatives (VFR) (77%), followed by business (13%), holiday (8%) and medical (2%). Compared to 2014, there was a decline in trips for VFR, holiday and religious.

With regards to total direct spend, Free State remained relatively stable by receiving 4% of the total spend in 2014 (R 26.8 billion) and 2015 (R23.6 billion) respectively (see Table below-SAT Annual Report 2015). The average length of stay decreased from 3.8 days in 2015 when compared to 4.7 days in 2014.

Potential Growth in Tourism in the Free State

The Free State Province is situated at the heart of the South Africa and it's central Geographical positioning and accessibility gives it a competitive advantage to become a destination renowned for hosting business tourism on behalf of South Africa.

The development of an International Convention Centre (ICC) will generally create substantial economic benefits, both for the tourism industry and the wider provincial

economy as inter alia conference delegates and/or business tourists are high-spending visitors. The development of an ICC not only boosts the provincial economy but it also creates opportunities during construction and when it is operational. The development will also support many more jobs across the tourism value chain including in the accommodation, catering, transport and retail sectors and across the economy. Despite the absence of an ICC at this stage, some of the popular major events such as MACUFE are already proving popularity of the Free State as a destination of choice. The Free State has an enormous potential to attract both local and international association conference wholesalers as a business destination of choice.

1.5. Environment

Protected Areas in the Free State Province include:

- 1 Caledon Nature Reserve
- 2. Erfenis Dam Nature Reserve
- 3. Gariep Dam Nature Reserve
- 4. Kalkfontein Dam Nature Reserve
- 5. Maria Moroka Game Reserve
- 6. Sandveld Nature Reserve
- 7. Seekoeivlei Nature Reserve
- 8. Soetdoring Dam Reserve
- 9. Sterkfontein Dam Reserve
- 10. Tussen die Riviere Reserve
- 11. Willem Pretorius Game Reserve
- 12 Karee Nature Reserve
- 13. Wuras Dam Nature Reserve
- 14. Ficksburg Nature Reserve
- 15. Koppies Dam Nature Reserve
- 16. Rustfontein Dam Nature Reserve
- 17. Inclusive of 16 Municipal Owned Protected Areas in the Free State
- 18. 1 (One) Stewardship site is Sneeuwberg Protected Environment
- 19. 208 Declared privately owned Protected Areas

Various factors have influenced land use patterns in the Free State Province, the most important of which are soil type, rainfall distribution, mineral deposits, transport routes and political background. Of the total FS surface area, agriculture accounts for 90% of land use, 7% is used for settlements, 1.6% is set aside for formal conservation, while mining activity occupies approximately 0.4% of the Province. Biodiversity is defined in the Biodiversity Act (Act No. 10 of 2004) as "the variability among living organisms from all sources, including terrestrial, marine and other aquatic ecosystems and the ecological complexes of which they are part and also includes diversity within species, between species and of ecosystems". Only about 3.4% of the land surface of the FS was formally conserved. The Vredefort Dome and Maluti-Drakensberg Transfrontier Conservation Area are World Heritage sites. A wide range of wetland types occur in the Free State, which contribute towards the overall biological diversity of the Province with Seekoeivlei Nature Reserve a Ramsar site of international importance. Climate change is expected to bring considerable warming and drying to much of this already semi-arid region, with greater frequency and intensity of extreme weather events such as heat waves, flooding and drought. Three biomes occur within the Free State, 2018/19 Annual Performance Plan

namely the Grassland (72% of the Province), Nama Karoo (22%), and Savannah (6%). The three key, inter-related threats to biodiversity and ecosystem health are habitat destruction, invasive alien species and climate change. About 34% of the grassland biome in the Free State has been irreversibly transformed through development, such as urban settlements, mining, agriculture and industrial facilities.

The average rainfall in South Africa is about 450 mm per annum, which is well below the world average of 860 mm per annum. In terms of the United Nations definition, South Africa is a water stressed country, bordering on water scarce. As a result, sound management of this valuable resource is essential to ensure optimum social and economic benefit to further the aims and aspirations of all the people.

The Free State Province is bordered in the north and northwest by the Vaal River, in the south by the Orange/Gariep River and in the east by the Caledon/Mohokare River. Numerous major tributaries, the Wilge, Liebenbergsvlei, Renoster, Vals, Sand, Vet, Modder and Riet Rivers divide the Province into eleven secondary drainage regions. Two primary catchment areas (an area of land from which any rainfall will drain into the water course) are located in the Free State, namely the Vaal River catchment and the Orange River catchment. Surface water resources are well developed through the construction of several large dams. The water supply is augmented by various transfer schemes that import water from other water management areas (WMA), as well as from the Kingdom of Lesotho. Future water supply will depend on increased water transfers. Groundwater is currently used for rural domestic supplies, stock watering and water supply to several towns, where surface water supply is inadequate or bulk water supply is not financially feasible. Groundwater is well utilised for water supply in the Middle Vaal, Lower Vaal and Upper Orange WMAs and is the only water resource available in many areas.

Deteriorating water quality is impacting on the quantity of water available for the different uses. Key issues of concern include the poor quality effluent discharged from municipal sewage treatment works due to overloading and/or poor operations and maintenance, polluted storm water run-off, high salinity pollution due to mining activities, as well as elevated salinity and nutrient pollution from poor farming practices. As a consequence of increased pollution levels, river health has deteriorated, resulting in loss of river functions and services, as well as the sustainability of the river ecosystem. Many wetlands of the Free State have also been directly and/or indirectly impacted upon by a variety of different land uses and from chemical and biological pollutants.

Ambient air quality is impacted by human activities. Coal and wood is still often used as a fuel for cooking and heating in lower income communities, which generates emissions that are harmful to health and quality of life. Parameters are monitored continuously and reported to the national DEA and DESTEA on a monthly basis. Methane, a greenhouse gas, is emitted from mining ventilation shafts. Waste incinerators have been identified as the principle source of dioxins and furans (Persistent Organic Pollutants (POPs). Other sources of POPs include obsolete pesticides, which have not been quantified in the Free State.

1.5.1 Policy Environment

The mandate of the Department emanates from national and provincial policies as well as legislative frameworks, as described in our 2015 – 2020 Strategic Plan. In addition to the policies and legislation mention in the Strategic Plan of the Department, the Presidency has developed a National Development Plan (NDP) Vision 2030. This plan, which maps out the direction South Africa should take to achieve Vision 2030, has been considered when developing the 2017/18 Annual Performance Plan. The main themes emphasised by the NDP includes:

- Economy and employment
- Economic infrastructure
- Transitioning to a low carbon economy
- Inclusive rural economy
- · Positioning South Africa in the world
- Human settlement
- · Promoting health and
- Social protection

The Medium Term Strategic Framework (MTSF), the Nine Point Plan of Government, the Provincial Growth and Development Strategy and the Provincial Programme of Action has also been encapsulated in the content of this plan.

1.6. Demand for services

The demand for environmental services is largely driven by the legislative mandate of the department to protect and sustain the natural resources of the province. The services provided by the department in this regard therefore focusses in the main on the enforcement of environmental legislation, the management of bio-diversity and climate change, as well as environmental awareness and education.

The demand for economic related services is attributable to both push and pull factors. The macro-economic policies of government has resulted in the rendering of certain services in order to achieve the various policy objectives, such as tourism and industrial development. On the other hand, the current low GDP and GVA levels in the province, coupled with significantly high levels of unemployment has necessitated the delivery of certain services, such as SMME support, mining town support and township revitalization.

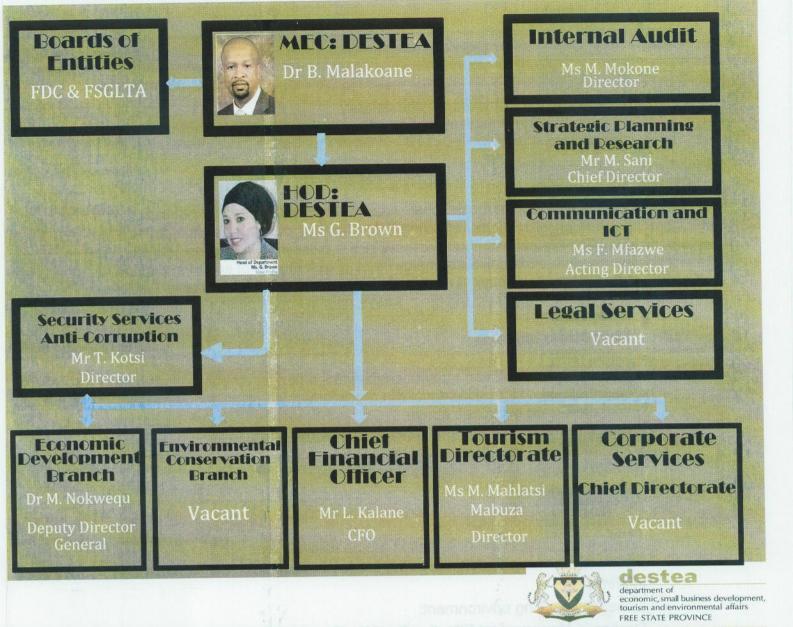

1.2. Organisational Environment

1.2.1. Programme structure

There are currently no changes in the programme structure of the Department.

The programme structure of the Department is illustrated by the table below:

Programme	Subp	programme
1. Administration	1.1	Management Services
	1.2	Financial Management
	1.3	Corporate Services
2. Environmental Affairs	2.1	Environmental Policy, Planning and Coordination
	2.2	Compliance and Enforcement
	2.3	Environmental Quality Management
Industrial Child Control of States	2.4	Biodiversity Management
	2.5	Environmental Empowerment Services
3. Economic and Small Business Development	3.1	Integrated Economic Development Services
	3.2	Economic Planning
to a the armay talk to a control	3.3	Small Business Development
4. Tourism	4.1	Tourism Planning
to a supremble public to be a common	4.2	Tourism Growth and Development
THE RESERVE OF STREET	4.3	Tourism Sector Transformation

1.2.2 Personnel and Capacity to deliver services

The department is still substantially understaffed in certain critical areas, such as Economic Development and Environmental Affairs. This understaffing impacts negatively on the service delivery imperatives of the department. In an effort to mitigate this situation and improve service delivery, the department will give more attention to the following core areas for the 2018/19 financial year:

- Identify and fill critical posts during this financial year. This will
 contribute towards the reduction of the high vacancy rate and the
 employees who are overworked will be relieved of some additional
 responsibilities.
- Roll out training programmes in order to empower departmental employees.
- Provide a comprehensive employee health and wellness programme by offering treatment, care and support to the departmental employees and their families.
- Maintain a sound labour peace in order to create a conducive

- environment for efficient service delivery.
- Ensure that the organisational structure is aligned to the departmental mandates.

1.2.3 Budget

The Department is continuously challenged with inadequate compensation and operational budget allocations, effecting the efficiency of services provided by the organization. The budget estimates for the MTEF is discussed in Section 3, below. We will however continue to seek and employ innovative methods of securing funding for some of the planned outputs. These include collaborating with other government departments, state enterprises and the private sector in implementing some initiatives.

1.2.4 Challenges experienced

The department is faced with an array of challenges, amongst others the following:

- Personnel and critical skills deficits in crucial areas as explained above;
- Fiscal deficits as explained above;
- Synergy between the different spheres of government;
- Local and global economic phenomena;
- Climate change.

1.2.5 Top ten risks

The main identified risks of the department are as follows:

- Incorrect information captured on the financial statements (annual and interim);
- Unhealthy working environment;
- Decline in Management Effective Tracking Tool (METT-SA) scores;
- Accelerated Climate Change effects;
- State of the Environment degradation due to land, air and water pollution;
- Non-compliance with EIA legal time frames;
- Outbreak of zoonotic diseases affecting game;
- Taking policy decisions based on out-dated, incomplete or without relevant information;
- Double Dipping of SMME's supported /assisted by the department and data management;
- Service centres not meeting expectations.

2. REVISION TO LEGISLATIVE AND OTHER MANDATES

The Department will continue to implement the Free State Growth and Development Strategy, MTSF and the National Development Plan, Vision 2030.

During 2014/15, Small Business Development was added as a new and additional mandate of DESTEA, residing in Programme 3: Economic and Small Business Development.

3. OVERVIEW OF 2017 BUDGET AND MTEF ESTIMATES

Below is an overview of the departmental expenditure since 2014/15 financial year to 2017/18 and the estimated budget for 2018/19 to 2020/21. A trend analysis is also provided in section 3.2.

3.1. Expenditure Estimates

Performance Plan

3.2. Relating expenditure trends to strategic outcome oriented goals

The Department spent R463 076 in 2016/17 and R488 926 in 2017/18 respectively. This expenditure trend is in line with the departments performance against its identified goals during the same periods. From the figures above it is clear that the budget allocation, especially the allocations to goods and services, infrastructure and machinery and equipment, will enable the department to achieve its targets as set out in this plan.

PART B: Programmes and Sub-programme Plans

4. STRATEGIC OBJECTIVES AND TARGETS

This section will outline indicators and performance targets for each strategic objective identified in Part 2 of the revised 2018-20 Strategic Plan.

For each Programme the following are outlined:

- 1. The aim of the programme;
- 2. Strategic objective annual targets for 2018/19 to 2020/21;
- 3. Performance indicators and annual targets for 2018/19 to 2020/21;
- Quarterly targets for 2018/19.

4.1. Programme 1: Administration

The aim of Programme 1 is to provide leadership and strategic management in accordance with Policy and Legislation and to provide appropriate support service to other programmes

4.1.1 SUB-PROGRAMME: MANAGEMENT SERVICES

Strategic goal: Provision of leadership for effective socio-economic development

4.1.1.1 Programme performance objectives, indicators and annual targets for 2018-21
