

**“JWALE KE NAKO YA KOTULO”**

## NOTICE

Operation Hlasela, through its power, has enabled government to interact with the people of the Free State, and it has been realized that the needs of the people differ from region to region, stretching from Fezile Dabi in the north to Xhariep in the south. The Free State government is now at a point where it has products, services and programmes that will unleash the economic potential of the people of the Free State.

Free State Provincial Government has adopted a move to use government purchasing power by ring fencing all products that can be supplied by cooperatives. Items include linen, uniform, maintenance, security, catering, protective clothing and laundry services. All the departments have been instructed to prioritize co-operatives for procurement of goods and services

DETEA calls upon all existing cooperatives to register into Free State Provincial Government Procurement Database. Free State Government officials will visit different districts to register cooperatives
